### Diamond Jubilee Celebration

Preparations for the great Diamond Jubilee celebration, commemorating Canada's sixtieth anniversary of confederation, to be held in Oyen, on Friday, July 1, are well under way.

A splendid programme has been arranged for the day, including a parade, patriotic singing and drills, and a grand pageant, in which all the provinces and the great North Land will be represented. There will be a senior baseball tournament, horse and pony racing, and a big programme of sports for pupils of public and high schools.

The parade will commence sharp at 11 a.m., starting in front of Mr. Thos. Lees residence. School pupils and school floats will assemble on the school grounds, other floats and personnel taking part in the parade will assemble on the land to the west of the school grounds. The route from the starting point will be east to First Street E. north to Railway Avenue, west to Main Street, south to Second Avenue, (Saluting the Flag while passing the Beaver Lumber office) east to Second Street E. and south to the fair grounds, where the grand pageant will be given, followed by patriotic singing and drills.

The programme of sports is given in another column. A special picture attraction will be shown in the evening at Oyen Theatre, Lon Chaney in "Tell It To The Marines", followed by a grand dance.

Look at your address label.

### M. D. of Cereal

The council of the Municipal District of Cereal, No. 212, met in the municipal office at Oyen, on June 11, 1927 at 10 o'clock a.m.

All members were present.

The minutes of the May 11th meeting were read and adopted.

The council met August 13 at 2 p.m., as the time the council will act as a court of revision.

The Secretary-Treasurer was instructed to notify the owner of S.W. 27-27-6-4 that wild lands taxes will be assessed against the land unless sufficient land is cultivated or cropped prior to August first.

The Secretary-Treasurer was instructed to notify Mr. Finstad that the council would not be responsible for any further hospital accounts for Mrs. Finstad.

The council decided not to give a grant to the Salvation Army.

The S.W. 18-26-6-4, the S.W. 20-27-1-4 and the East half of 8-26-5-4 were exempted from wild lands taxes upon appeal.

The Reeve and Secretary-Treasurer were authorized by the council to arrange with the Bank of Toronto for a line of credit, borrow and make the necessary June 30th school payments.

The following accounts were passed: G. A. Morrison, Gopher poison, 45.00; Dept. of Public Health, Re. Mrs. Finstad 25.00; Atty. Gen. Dep't. Mot. 20.00; J. P. Hornbeck, Postage etc., 2.50; J. P. Roraback, Salary for May 1927, 150.00; Alta. Gov't. Telephone, 4.70; Maxine Sutherland, Poisoning gophers, 1.00; J. Barker, Road work Div. No. 6, 18.00; A. Wade, Road work, Div. No. 6, 5.00; W. Horne, Road work, Div. No. 6, 1.50; A. Andrew, Road work, Div. No. 6, 1.80; D. McQuarrie, Road work, Div. No. 2, 7.40.

The council appointed J. E. Werry a committee to lease S.W. 25-26-6-4.

The council decided not to sell N.E. 15-20-1-4 for amount against it.

The council appointed councillor Olson a committee to report on the building on the N.W. 36-26-5-4.

The council set the price of \$100.00 for the house on the N.E. 3-28-5-4.

The secretary was authorized to accept credit to the amount of 15.00 per month as relief to J. Scullin.

A grant of \$200.00 was given to the Oyen Agricultural Society for 1927.

By law No. 51 was given first and second reading.

The financial statement was accepted.

The Secretary-Treasurer was authorized to arrange with Johnson for lights.

S. J. Cooley was appointed a committee to lease N.E. 3-28-5-4.

Council adjourned to meet again on July 9 at 10 o'clock a.m.

J. P. Roraback,  
Secretary-Treasurer.

### C.N.R. Building Big Depot

Construction work is being started immediately on the half million dollar depot to be erected in Edmonton by the Canadian National Railway, the contract was awarded last month to the Permanent Construction Co., Edmonton.

## AFTER SEEDING SPECIALS

Last week we unloaded our first car load since the fire. We are completing our cellar and warehouse and hope to serve you better. The best of goods and the best of service.

### Prices Good Till June 25

White sugar, per cwt	8.10
14 lbs. white cooking beans, for	1.00
Dollar box soda biscuits	.70

## CANADA IS IN SOUND POSITION SAYS HON. ROBB

Ottawa.—There may be better risk than a position on the Canadian side as it is by all the people of Canada, asked Hon. J. A. Robb, Minister of Finance, addressing the Investment Bankers' Association in convention here.

"Government is simply co-operation on a large scale, with the strength of the Government tested by the wealth and property of its citizens," declared Mr. Robb. "The main thing Canada has repeatedly submitted itself during the past 12 years; Canada has Canadians stand the test; Canada business men requested everywhere, their word as good as their bond; Dominion lands are now over part; the Canadian dollar is at home and abroad was never better; while Canadian products, raw and manufactured, are in steadily increasing proportion sold in the market places of the world."

Addressing the northward extension of Canadian frontiers, Mr. Robb declared: "Often I stand before the map of Canada and look at that narrow strip of land which stretches from coast to coast. It is not the breadth but the narrowness that is its problem. It is like an elastic belt—in stretching it we narrow down the width—but having reached the geographical limit it is high time for us to broaden out and thus balance our own sectional divisions."

"By consolidation I do not mean grouping of groups or groups of provinces to another, but rather the pushing of our frontiers into the North, bringing to the use of man more diversification of resources so that no section will have, as the saying goes, 'all its eggs in one basket.' Success in this respect will develop interests in commerce and encourage willingness to come to one another and find solutions of problems from time to time arise. In this great work your activities are playing an important part."

Continuing, Mr. Robb stated that the year 1927 do not own the natural resources of Canada. We are simply trustees for future generations, and indiscriminate squandering of trees or stripping of mineral veins would have really been a crime. Valuable may be had investigation from the national viewpoint.

Events touching the conservation of our natural resources should not be considered simply as schemes which will produce immediate results. I do not object to putting our natural resources to their full use, but submit that provision should be made for replacement whenever possible and that the practical need of Canada—not of other countries—at this moment should determine our policy.

## Ontario Farmers Are Supporting Wheat Pool

Campaign Meeting With Success and Many Contracts Signed

Chatham.—The campaign for members to the Ontario Wheat Pool is meeting with success, in the neighborhood of 3,500 farmers of Kent County having already signed contracts, according to J. S. Jeffrey, manager of the grain department of the United Farmers' Cooperative Society. "We have already approximately 7,500 farmers signed up in Essex, Kent, Lambton, Elgin, Middlesex, South Perth, Huron, Huron and Simcoe counties," he said. "Arrangements have been made with practically all the elevators in the country to handle pool wheat, according to Mr. Jeffrey."

Want Funds for Relief Work  
Vancouver.—Relief of cases of distress among war veterans and their families is the purpose to which the organized ex-servicemen of British Columbia with the \$250,000 campaign for this province to be port which a conference here of representatives of the Canadian Legion, the Army and Navy Veterans' Association adopted.

Amundsen Sails for Orient  
Vancouver.—Captain Roald Amundsen, well known explorer and the only man in the world to have reached the two poles, is preparing to sail for the Orient, leaving on his 70th voyage to the Orient. Captain Amundsen, who flew to the North Pole and also reached the Pole on his famous expedition, is looked for Yokohama.

## Premier Brownlee Going to England

Will Inquire Into Establishment of Agency in London

Edmonton, Alta.—Premier Brownlee is going to leave on a trip to England towards the end of this month. He has been considering the possibility of making a trip for some time past. It will be only in part a holiday event, however, for he has a full program of things that he proposes doing over there for and in behalf of the Province of Alberta.

A first hand check-up on the immigration work now being carried on in London, Herbert Greenfield and an inquiry into the possibilities of a general money office in London will be one of the main purposes of the trip. The Premier will discuss the situation with various interested parties and organizations, and will see for himself what is the feeling in England towards closer relations with Alberta. In view of the improved position of the province he will also sound out the attitude of British industry and capital in the same direction, particularly in the hope of interesting further investment in the western Canadian field.

Another item on the premier's program will be an inquiry into the question of marketing Alberta products in England. In this respect he will be working in line with the Saskatchewan government, which has already sent a commission to the motherland to investigate the conditions of the livestock trade, and has been trade, while Manitoba also is considering a similar step. So far as Alberta is concerned the inquiry in addition will bear largely on wheat marketing, about which Mr. Brownlee will ask a lot of questions during the trip. The Premier is very much anxious to get away and hopes to sail some time in the last week of June.

## Abandons Quest in Arctic

Wilkins Believes Further Flights This Summer Would Be Foolhardy

Fairbanks, Alaska.—For this year at least Captain George H. Wilkins has abandoned his attempt to winter on the uncharted Arctic by the way of the North Pole. The flight of the plane which had long low over the Arctic coast in the summer, Captain Wilkins believes that further flights North of Alaska this summer would be foolhardy. He believes that the weather conditions in the Northern base of the expedition, the Alaskan coast, and the other members of his party left for the United States.

The explorer has made three flights from Fairbanks, Alaska, in an effort to prove or disprove the theory that there are islands between Point Barrow and the North Pole. The second air voyage into the Arctic was made two months ago and nearly ended in disaster when the plane was forced down with engine trouble on the ice pack.

Wilkins and Elton Elson, Alaskan pilot, walked 50 miles over the ice pack. Starting from Point Barrow, Wilkins and Elton, Alaska, Detroit pilot, made the flight on August 4. They flew 200 miles toward Greenland but were forced by dense fogs to return.

Want Peace Treaty  
Washington.—An informal inquiry as to the willingness of the Washington government to begin negotiations for a treaty of perpetual peace between France and the United States has been placed before state department by Foreign Minister Briand. The inquiry is in the hands of Secretary Kellogg, who is expected to answer it within a week.

New Cable to Pacific  
Victoria.—The freighter Decidville has been ordered to unload 20 miles of cable which will form the last link in the new cable that connects up Canada with Australia. The line when completed will double the capacity of the cable business between the units of the British Empire.

A Long Auto Trip  
Los Angeles, Calif.—A 6,700-mile trip in an automobile from the Pacific coast to New York city and back in seven days was completed here by Louis D. Miller, San Francisco business man, who claimed a new record for continuous motor travel and for elapsed time in the transcontinental tour.

Will Be Settled at Geneva  
Belgrade.—It has been announced that Jugo-Slavia is willing to throw out the Albanian difficulty through the League of Nations and that there is no indication under consideration or a basis for rumors spread abroad of martial law in Belgrade.

## Plan Confederation Memorial

Victoria Club Members Will Launch Campaign Shortly

Victoria, B.C.—Direction of a temporary memorial to commemorate the achievements of the fathers of confederation will be the contribution of the Victoria Klansmen's Club to the diamond jubilee of confederation celebration here next month. The Victoria club will shortly launch a campaign to have erected in the capital city in each Canadian province a permanent memorial to the Fathers of Confederation to be built by the provincial governments with the assistance of the Federal Government.

## Arrested on Serious Charge

D'Auteourt Brothers Are Taken Into Custody in Ohio

Stenhouseville, Ohio.—Ray and Raymond, wanted in Oregon for the killing of a postal clerk and trainmen in a passenger train held up four years ago, were arrested by federal agents and local police. The two brothers, for whom a world-wide search has been conducted, were working in a steel mill here. Both aimed at a \$100,000 prize when they were arrested, which was conferred by officers.

The brothers are accused of dynamiting a passenger train in a mail hold-up at Hickory, Oregon, in 1922.

## WILL CONTINUE NEGOTIATIONS ON BORDER RULING

Washington.—Ample protection to all Canadians wishing their birth place who have been in the habit of commuting across the international border to daily employment is assured by the United States in a note from the Canadian Government. The note is in reply to a recent note from the United States on border immigration regulations.

Hon. Vincent Massey, Canadian Minister, delivered the note to Frank Kellogg, Secretary of State. Comment from the state department will be withheld until officials have considered the Canadian communication more fully.

The note approves the offer of Mr. Kellogg to continue negotiating on border immigration and expressed the hope that a satisfactory settlement will be reached but regret that the United States government cannot agree to waive the border ruling on April 1, which went into effect June 1 and which gives immigrants a maximum of 30 months in which to secure entry as immigrants under the quota law.

It points out that there is no precedent for the application of the term "immigrant" to citizens legally domiciled in another country and holding their citizenship in that country.

The Jay Treaty of 1793 is quoted to illustrate the broad principle of free border movement to promote a disposition favorable to friendship and good neighborhood, and the note points out that the law of Canada makes no distinction between citizens on the strength of birth place any more than do the laws of the United States distinguish between native and naturalized citizens.

## Thousand Square Miles of Blossoms

Nova Scotia's festival time is fast approaching, when a thousand square miles of the world-famous apple growing valleys will be smothered in bloom. One of the significant days in this province is "Blossom Day" when people go by thousands to the Annapolis Valley to look upon the white and pink tabernacles of fragrant blossoms. The journey over this time of year affords a trip long to be remembered, as the apple blossoms are the very heart of the province.

## ASSASSINATION OF SOVIET ENVOY TO BE PROBED

Warsaw.—The Polish authorities have taken drastic steps to determine whether the assassination of Peter Volkoff, Soviet envoy at Warsaw, was part of a Russian plot. Volkoff's assassin was a young Russian student, studying at Vilna. The Polish police conducted searches and made arrests among the Monarchist columns in both Warsaw and Vilna, five arrests at the capital and 29 at Vilna.

The Russian newspaper Vimpna-Rossia, which issued a special edition recommending subscriptions for the murder, was promptly suppressed and the editor arrested.

The Polish government is doing everything possible, it is announced, to fulfill the requirements of justice, and has accepted the Soviet demand for participation in the investigation. The Polish law permitting such a course.

M. Litvinoff's sharp note has made a lasting impression in Polish governmental circles, which deplore the tragedy and regard it as an internal Russian affair which accidentally happened in Poland, for which Poland has no moral responsibility. It is believed the Soviet Union will be satisfied with nothing less than the full truth of the assassin, but it is not expected the tragedy will seriously impair relations between the two countries.

## Socialist Mayor Ignored

No Invitation for Plymouth's Chief Magistrate When Prince Visits

London.—The Prince of Wales has arranged to make a tour of Cornwall and Devonshire for several days, and in connection therewith some recent comment is felt because these in charge of the Royal Western Yacht Club's proposed dance in Plymouth, Devonshire, have not invited Mayor J. J. Hamlyn Moses, Plymouth's first Socialist chief magistrate, to the dance. The town clerk and other members of the Plymouth council have been invited.

"I am too big to mind, personally," Mayor Moses said, "but it is the town that matters. It is reasonable that any such sort of amusements should be allowed to creep in and form a function like this."

## Western Graduates

Toronto.—The Senate of the University of Toronto has announced the award of fellowships in the school of graduate studies for the session 1927-28, including the following winners: Mackenzie Fellowships—J. R. C. A. Polard, Saskatchewan, department of history; Special open fellowships—J. Casper, Alberta, department of classics; J. E. Calvert, British Columbia, department of English; L. S. Russell, Alberta, department of geology.

## Sending Delegation to Germany

London.—The British Legion of the Empire Service League has decided to send a delegation to the International conference of service men at Luxembourg in July. German ex-servicemen will also attend.

## Bay Ports Inquiry

Some Misapprehension Felt in West Over Investigation

Ottawa.—Carrying out the Hudson's Bay Railway project is being accomplished with some difficulty although it will be done, there is no doubt about that. For years in the East, the scheme has been opposed on a leading paper referring to it persistently as a "Zantastic mirage." Parliament, until this session, was either antagonistic or apathetic but Hon. C. A. Tinning, then succeeded in getting through, with comparative ease, the appropriation that commits the Government to the completion of the line.

Now, when matters have been pretty well squared away in the East, criticism comes from parts of the West because the merits of Churchill as well as Nelson are to be looked into.

As has been pointed out, the decision to investigate Churchill does not portend its selection as the terminal. As a matter of fact, it is believed that the proposal of inquiring into Churchill came from the British agent, Frederick Palmer. He argued that the British had a right to cover both places and that in any event, his remuneration would be the same whether it all there is to it. Hereafter, Nelson alone has been considered. Now, Churchill also will be looked over and detailed data secured as to both locations. The wider inquiry, however, does not indicate the choice of Churchill but at the same time that of Nelson. It is as a possibility it is felt that its advantages exceed those of Port Nelson.

## Appointed by Lincoln

Act. Resident of St. Cloud, Minn., Was Real Pioneer

St. Cloud, Minn.—Charles A. Gilman, 94 years old, former Lieutenant-Governor of Minnesota, and one of the pioneers of the northwestern states, who received appointment to public office from Abraham Lincoln, died recently from old age. Mr. Gilman, who had resided here for 72 years, was appointed receiver of the United States land office in 1861 by President Abraham Lincoln, and was appointed in 1866 by President Andrew Johnson. He served as lieutenant-governor from 1881 to 1885. Two daughters and a son survive.

## Plea For Tolerance

Hon. Peter Hennrich Criticizes Those Who Sow Seeds of Discord

Ottawa.—Hon. Peter Hennrich, Minister of Labor, would have a message of tolerance and co-operation broadcast throughout the Dominions at Canada's jubilee celebration message, he told the members of a local society. He severely criticized of those who sowed seeds of discord and division in religious or social matters, referring to the cry of Communism that lately has been heard in this country. The speaker said more had been done in behalf of the workers within the past ten years than in the previous half century.

## NAME DELEGATES FOR BRITAIN TO NAVAL PARLEY

Washington.—Names of delegation who will represent Great Britain and her Dominions at the Geneva three-power naval limitations conference have been submitted to the state department by the British embassy and the Canadian and Irish legations. Viscount Cecil, who for years has represented Great Britain in disarmament conferences in Europe, will head the delegation, assisted by W. C. Bridgeman, First Lord of the Admiralty, who will also represent India, and Vice-Admiral Sir S. B. Field, deputy chief of the naval staff.

Canada will be represented by Hon. Ernest Lapointe, Minister of Justice. In the event that he fails to arrive in Geneva by June 26, the opening date of the conference, Canada will be represented by his permanent agent, Dr. W. V. Hildell.

J. S. Smith, high commissioner for Canada in South Africa in London, and C. P. P. Keir, trade commissioner for Europe will speak for the United States. Sir C. Cook, high commissioner in London, will represent Australia.

New Zealand will be represented by J. P. Farr, Dominion Commissioner, and Earl Jellicoe, Admiral of the Fleet. For the Irish Free State, Desmond Fitzgerald, Minister for External Affairs, and John Costello, Attorney-General, will be present.

## ALBERTA COAL RATES TO EAST ARE ESTIMATED

Ottawa.—Three widely differing estimates of the cost of transporting Alberta coal to Ontario were before the Board of Railway Commissioners. The estimates were checked by including arrays of statistics and the testimony of three prominent rate experts.

E. P. Malley, C.N.R. expert, represented the estimate prepared for the railway on the "out-of-pocket" cost of transporting the coal from Drumheller to Toronto. His estimate was \$15.2 a ton. This estimate included \$3.27 of revenue which would be lost from American railroads supplanted by the Alberta product.

George W. Oliver, Chicago, counsel by the province of Ontario, presented an estimate of \$18.25 to \$18.4 a ton between Drumheller and Toronto and an estimate of from \$16.2 to \$18.2 a ton from Edmonton to Toronto.

He was followed by S. W. J. Laidy, C.P.R. statistician, who estimated the cost at \$27.50 a ton from Lethbridge to Toronto and at \$31.1 a ton from Keston Hill, Alta., to Toronto.

The estimates were presented to that of Mr. Oliver particularly as to repair costs for cars used in transporting coal and the expense involved which such cars would carry.

The estimates of these witnesses covered the cost of a movement of 1,000,000 tons of coal on the C.N.R. between the same points.

Mr. Malley gave a careful survey of the evidence by which he reached his estimate.

He allowed, he said, for a 2.5 per cent increased cost due to recent or possible increases in the cost of coal. Mr. Malley estimated that with shipments of 1,000,000 tons of Alberta coal to Ontario the operating revenue lost to the railway on shipments of United States coal which would be displaced would total \$1,000,000. He estimated that on a per cent operating cost to provide all income charges and expenses, the Malley estimate of cost on the 1,000,000-ton shipment the additional cost to the railway would be \$1,000,000. He estimated that the cost of transporting Alberta coal would be \$22.6 a ton. Mr. Malley's estimate of a fair profit was figured at a rate of 54 per cent, on a per cent operating cost, which resulted in a figure of \$23.18 per ton.

## Shley Team Has Sailed

Montreal.—The Canadian Hockey team will represent the S.S. Australia from Montreal on June 18. The team will first represent the United States, then the British Empire, and then the Dominion of Canada. The team will be captained by Major Thomas McLennan, Belleville, Ont., as captain. In addition to the team will be a group of players from the Hamilton College Institute, who are also going to Shley to take part in the prize meet.

## New Mining Company for B.C.

Victoria.—With \$100,000 cash, C. C. Johnson, noted California oil operator, formerly entered into the British Columbia business and development field on a large scale. The formal pact was completed at the Parliament buildings when Julian was granted incorporation papers under B.C. laws to operate in this province under the name of The New Monte Cristo Mining Co., with a capital of \$100,000.

Spent Weeks in Peruvian Wilds  
Toronto.—After weeks of terror in the Peruvian wilderness, Robert Hertz, electrical engineer, who was first reported missing and then dead in the wilds of interior South America, has returned safely to his home (Toronto). Hertz was reported to have been in the jungle for a week with occasional alarm as to his safety.

## May Have Crossed Ocean

Montreal.—A crested pigeon with a ring fastened to its leg was seen in the city of "Libre, France," was captured by J. L. Martin, a farmer of St. Constant, about 100 miles from Montreal. The bird was practically exhausted when caught and is now being taken care of by the farmer until it is claimed, if ever, by its owner.

## To Attend Naval Conference

Washington.—Canada has notified the United States Government that the Dominion will be represented at the naval limitations conference at Geneva.

# The Magnitude and Variety Of Work Being Carried On To Assist Scientific Farming

The personnel of the Central Experimental Farms at Ottawa includes seven experts, and the list of the various fields of work includes Botany, Agriculture, Bacteriology, Apiculture, Zoology, Entomology, Horticulture, Cereals, Tobacco, Growing, Economic Fibre Production, Illustration work, and lastly, Extension and Publicity. There are branch farms and stations in each province and also in Yukon Territory and in the North West Territories. In it is noted that, in Prince Edward Island, there is an Experimental Rice Ranch.

Some three or four years ago Dr. J. H. Grisdale, of the Department of Agriculture, read a paper before the Conference in Scientific and Industrial Research, which was a sort of summary of the activities of his department. Speaking of Field Husbandry, he pointed out that they are carrying on experiments in relation to the purpose of discovering the most satisfactory sequence of crops on their farms they had been conducting a series of experiments under experiment; on the same farms they were conducting cultural experiments with a view to determining the best method of cultivating the soil combined with the most economical production. Merely as an example of what he means, he quoted the fact that at one farm they had about twenty acres laid off into plots of one-fourth of an acre each.

Periodic experiments have been carried on, the object being to learn on a field scale what applications of manure or fertilizers give the most profitable results. There are also elaborate experiments to find out what crops can be most successfully used for change in various parts of the country. The matter of drainage offers one of the most difficult problems connected with agriculture, and in the Dominion are being carried on from one end of the Dominion to the other. The trifling areas are comparatively limited, but they are all of very great importance indeed, including, as they do, some of the most fertile districts of the country.

There are also hand clearing experiments as well as those connected with the use of the various types of implements used in a vast area to our available agricultural land.

A few of the activities engaged in by the cereal divisions are as follows: Production of superior varieties of cereals, wheat, oats, barley, etc., test of all varieties of cereals; studies of superior varieties by selection; milling and baking tests; cooking tests of peas, beans, and cereals; studies in yields and fermentation; inventing and adapting new machinery for use with crops connected with the division.

Under the heading of the Health of Animals Branch and the Experimental Farms Branch are co-operating with a view to studying the influence of conditions of husbandry on the prevention or controlling contagious abortion, etc. Under Housing, a study is being made of various affecting conditions, such as economy of handling, the general comfort of the animals and of the men looking after them. Under Hygiene is included the study of the influence of the blaster rust of white pine; investigations into rust of cereals and seed diseases of grain. But a mere glance at the shelves of the Library of the Department of Agriculture will give some idea of the magnitude and variety of work being carried on in connection with scientific farming.

**A Regular Thing**  
"Is your sister thin?" asked the young man.

"No," replied the small brother, promptly. "She's just come out."

"Is the love-sickness one slighted?"

"So I am like the man who went to the cage when the bird had flown."

"Oh, no, you aren't," replied the teasing boy. "You're like the tooth of June. Because every time you come in May goes out."

**Early Explained**  
Claims are being made that a new one is the very shortest funny story on record. It was told by Sir Harry.

"We hoists," he said, "are very fond of telling stories against ourselves, and I expect you sometimes wonder why we have such a great sense of humor."

"Well, I'll tell you. It's a gift!"

No man can hope to be happy married unless he is a good listener.

W. N. U. 1685

## Solving Rust Problem

Important Discovery Has Been Made, It Is Reported

A discovery of great scientific importance in connection with wheat rust has been made in the Dominion research laboratory, according to an announcement made here by Dr. H. H. Tury, chairman of the National Research Council. No indication is given as to the nature of the discovery but "an early account may be expected," according to Dr. Tury. The laboratories of the department of agriculture in Winnipeg and of the three provincial universities are co-operating closely in the investigation. It is stated that this much information has been given out as a result of the meeting of the National Research Council.

The council's committee on grain research is to undertake a study of the effect of moisture and various methods of drying upon the value of wheat for milling purposes. At several places in the West fields are being prepared for this investigation and portions of the crop will be left in the fields to determine the effect of different weather conditions. An effort is to be made to solve this problem in the shortest possible time.

## Secures Additional Moisture

Importance of Better Belts on Prairie Farms Cannot Be Overstated

The planning of better belts around farms on the Canadian prairies has given appreciable results from the agricultural standpoint. The water conserving power of the soil has been increased; better crops have resulted; and the protection from extremes of temperature and wind movement has enabled the introduction of the hardier fruits in many localities. Of the greatest importance is the additional moisture secured through the formation of snowdrifts which melt gradually in the spring, providing water after adjoining open areas have largely dried up.

## Fish Canning Plant

Establishment of a fish cannery plant on Lake Winnipeg this summer is assured, and final arrangements as to location and construction is being made. The project is being carried out by J. M. Davidson, secretary of the Industrial Development Board. Dr. Fisher is the promoter of the scheme. He proposes building two plants, one near the Iroquois River for summer catches and packing, and one further south for the winter season. The company will can whitefish, pickerel, lake trout and bass.

"Call yourself a typist," fumed her employer, "and you can't fix a ribbon on the machine!"

"Well," she demanded haughtily, "does Paderewski know how to tune a piano?"

"He—do you happen to know that little girl I've been dancing with?"

"She—surely? That's mother."

The nightingale is no more interesting than the midnight cat to the man who wants to sleep.

## Anglers' Harvest Assured

The 1930 harvest for anglers in the Canadian Rockies is just beginning at the Banff Hatchery. The fishy youngsters, who are making their initial appearance, are breaking trout from eight hundred thousand brown trout eggs which have been shipped to Banff by Canadian Pacific Express from Winnipeg, Man. and Pakenham, Ont.

The eggs, which had developed to the "eye-stage" before being shipped, were packed in shallow chestnut trays, insulated by damp moss with a supply of ice to provide constant moisture. Several weeks after they had been received at the hatchery the young trout broke their shells and began another period of their growth, which lasted some weeks longer.

During the period of the growth, the supply of food from a stick attached to their undersides, and when this had

## Farmers May Surprise Professor

Take Advantage of Travelling Libraries to Gain Knowledge

An enthusiastic professor from any one of the well known universities visiting the rural districts of the Canadian prairies would probably find in the most remote sections farmers and other residents who could discuss with him informatively any subject from the merits of the latest best seed to the most recent issue on the Plowin theory. Such is the educational advance provided by the travelling libraries maintained by each of the Provincial Governments in the Western provinces.

These libraries began to function about thirteen years ago. Government authorities in Western Canada realized that life without books is a somewhat barren experience. Hon. Walter Scott, a former newspaper man who was Premier of Saskatchewan in 1914, was one of the pioneers of the venture. He induced the Provincial Legislature to vote a moderate amount of money to buy a few hundred books to start the travelling libraries. Since then, the travelling libraries have grown to be immensely popular. Last year 1,261 travelling libraries containing 69,567 volumes were distributed throughout Saskatchewan and the distribution in the other Western provinces was proportionately large.

For the benefit of the individual student who desires to make a special study of such subjects as sociology, history, philosophy, and so on there is what is known as the open shelf library. The books in the open shelf library always contain a percentage of the best books reviewed in the leading magazines and newspapers. So well are these books selected that the first travelling library sent out in Western Canada, which was made up of standard works, is still going the rounds.

## Manitoba Poultry Pool

Final Pool Payment of Co-operative Poultry Marketing Association

The final pool payment for the Manitoba Co-operative Poultry Marketing Association was announced. The association has shipped 429,921 dozen, or more than one and a half million eggs, this season, from March 24 to May 23. This was half a million more eggs than in the same period last year. The organization is very busy just now and many eggs are coming in.

## Some Never Learn

It is a pity that drivers who have driven their cars 600 miles or over will not require an examination before receiving a license to drive. Yet some of those who are most reckless on the highways have driven ten times that distance, and have still a great deal to learn.

Grandpa says there are often bigger nuts in the automobiles than on them.

# Radio Plays Important Part In Maintaining Communication With Canada and Old Country

## Will Work Together

On Immigration

Hon. Robert Forke Predicts Close Co-operation of Provinces

Development of Canada's Immigration policy through closer co-operation with the governments of the various provinces was indicated by Hon. Robert Forke, Canadian Minister of Immigration and Colonization, who is in England in connection with immigration to the Dominion when the Canadian Press asked him what would be the probable result of his investigations here along immigration lines.

"I have been very much impressed by what I have seen at one of the training farms of the British Government where intending settlers receive three months instruction in the practical work on a farm," Mr. Forke said. "These men are genuinely interested in learning about farm work and I would have no hesitation about employing them myself as a Canadian farmer."

Mr. Forke has left London on a tour of the various emigration agencies in Great Britain. He will also make a short tour on the continent and probably will visit the Scandinavian countries.

## On Breeding and Feeding the Hog

Advisable Methods to Follow on the Farm

"Reading another full man" quoth Lord Bacon. Another learned authority has said that "experience is the best teacher." Both sayings point out the merit of truth but combined they make more the perception of the acquisition of knowledge as it is possible. In modern times the combination cannot well within the possibilities. The agriculture, for instance, a week passes in Canada that a publication is not placed in circulation dealing with some branch, furnishing valuable information founded entirely on experience and sound research. One such is the Dominion Agricultural Almanac, which is treating on the "Breeding and Feeding the Market Hog," in which Mr. G. H. Radwark tells the advanced farmer to follow on the farm. He tells the young stock should be selected from a good strain can be developed, what course to pursue in raising the breeding sow, in breeding two litters a year, in selecting sows in housing, in feeding hogs, and little pigs, and advice on feeds that may be home produced and those that must be purchased. He also gives important counsel on necessary mineral supplements, remarking in doing so that "No domestic animal can flourish without the results of mineral deficiency as does the pig."

## U.S. Settlers For Canada

Michigan Was Largest Contributor of Candidates Last Year

Canadian statisticians have been figuring on the immigration into the Dominion from the United States, and have produced some interesting results. Michigan was the largest contributor of candidates for Canadian citizenship in 1926; that state sent 2,561 of its people across the line with intention to settle permanently. New York and Washington were tied for second place with 1,527 each. Minnesota stood next, contributing 1,475 with North Dakota, 1,279, California, 1,262 and Massachusetts, 866, in the order named.

## Canadian Grown Tobacco

Growers From Kentucky Are Moving to Ontario

"The American tobacco grower realizes that he must seek a new field where growing and marketing conditions are better," states Robert J. Thomas, chief field man for the Ross Tobacco Co. of St. Thomas. "They naturally look to Canada where the industry is in its infancy, where the soil has not been depleted, and where the British preferential tariff makes growing profitable. The migration of these Kentuckians and the tobacco growing has only begun."

Due: You're pretty badly beaten; you ought to keep out of such bad company.

Victim: I'd like to, but she won't let me get a divorce.

Mr. Briggs—Well, sir, your shagdog will never take me to the wolf of dead of us!

Bored Listener—How long has it been dead?

Many a man who refuses to believe the truth will swallow a lie.

## Radio Plays Important Part

In Maintaining Communication With Canada and Old Country

Canada's first use of radio was the establishment of radiotelegraph communication between stations in St. John's and Chatham Bay on the mainland on the north side of the Belle Isle Straits, a route of importance for a submarine cable which was constantly being interrupted by icebergs.

The stations were built by the Marconi Company. Power for the transmitter was obtained from dry batteries, and the receiving sets were of the most primitive type, using Marconi's receiver of metal filings in a glass tube as the detector.

Since 1901, when 50 miles was a long range for a station, progress in radio has been steady. In 1902, Sir Wilfrid Laurier invited Mr. Marconi to Ottawa, and as a result a transatlantic radiotelegraph service between Canada and Great Britain was established. This service was inaugurated in 1907, and has been maintained ever since that date.

The apparatus of the Glace Bay radiotelegraph station was, of course, constantly altered and improved from time to time, and last year the station was discontinued and the service transferred to a Beam Station, the latest type of radio, located at Drummondville, P.Q.

At the time of Confederation, a trip across the Atlantic was still an adventure, taking from two to three weeks. Today the liners run with a regularity approaching that of a railroad service, and a passenger, a few days before the ship is due to arrive at Montreal, by means of long distance radio, is able to reserve a room and table for his stay on a certain day, as a matter of routine. As the ship approaches within 500 miles of the Canadian coast, she comes within the range of the chain of "old to navigation" radio stations; if she is in a fog she verifies her position by means of the direction finder; if she desires to check her chronometer, she does so by means of the radio time signals. Every twelve hours the package is provided with complete weather forecasts for the area in which the ship is steaming; and he is advised of the exact location of any icebergs in his track.

The Great Lakes and East Coast "ship to shore" radio system consists of an interconnecting chain of 20 stations and 6 beacons, extending from Port Arthur on the north to the Great Lakes to the Atlantic, and on the Pacific Coast a chain of 14 stations extending from Victoria to the Gulf of Mexico.

The Dominion, a country of vast areas and sparse population, tends itself to the use of radio in broadcasting, and there are today some 400,000 receiving sets in operation.

Canada has today some 81 broadcasting stations, practically all of which are operated by private or commercial interests for indirect advertisement or publicity in one form or other.

The Province of Manitoba has established a provincial broadcasting station, and that other provinces are considering the adoption of a similar policy. The Federal Administration has authorized the use of radio in broadcasting to this Dominion and will see that it develops along the lines which will give the best possible result to our listening public.

## The Ungallant Contractor

One of these women who try to appear as young that they are even ashamed of having their children get bald and give them away on the street car with a little girl and gave the contractor full fare for herself and half fare for the child.

"Excuse me, madam," said the conductor, "but your daughter seems to be more than twelve years old."

The woman put on an expression of surprise and exclaimed: "Why, conductor, you never take me to be the mother of a girl that age, would you?"

The conductor drew back and looked at her boldly in his infancy, where the child, "Lucky didn't tell me that you are her grandmother!"

"Why am I depressed, Brown?"

"The horrible cost of living, old chap. Constant bids for materials, paint, shingles, your house!"

"So, daughter?"

"Brown—Yes, I'm saving up to buy a car."

Smith—"When are you going to get it?"

Brown—"Get it? We've had it for eighteen months now."

Endless Plans: Of course I take my own plans with me wherever I go.

Phyllis: How? Makes you wish you'd learned to play the flute, what?

## Winter Egg Production

865 Eggs Per Month From 52 White Leghorn Pullets

The contention that winter production is not possible during the winter months has been time and again disproven. The following achievements of a poultryman in Northern Alberta will further dispel the statements. During the winter season of 1925-26, a flock of 52 White Leghorn pullets were kept in a house 12 feet wide by 14 feet long. The pullets commenced laying on October 1, when they were five months old. In the five months from November to March inclusive, they produced a total of 4,235 eggs or an average of 86.5 eggs per month. This makes an average production of 55 per cent. The following winter the same owner maintained a flock of 52 White Leghorn pullets which were five months old on October 14. During the months of November to March inclusive they produced a total of 4,296 eggs or an average of 86.5 eggs per month or a production of 45.5 per cent. The reason for the lessened percentage production can directly be attributed to the pullets being hatched two weeks later than those in the flock the previous year.

## Inattentive Mind Affects Health

Scientists Believe Self-Suggestion Has Place in Medical Treatment

Though some connection between mind and body has for centuries been suspected, it is only of recent years that scientists have attempted to trace its workings. Though, the theory is that behind the ordinary everyday thinking mind of man lies a hidden second "self" concerned only with impulses and instincts and that this instinctive mind exercises an enormous effect upon our bodies without our reason knowing it. Consequently, it is suggested that with a remark of "How ill you look," you begin to feel worse almost immediately, without quite knowing why. This self-suggestion is now being used to find a place in medical treatment.

## Winnipeg Newspaper Union

1603

A Frook of Smart Simplicity

Unusually smart is the attractive outfit displayed from a picture here, having such plaid and panels, short kimono or knee-length trousers, and a shawl collar fastening the V-neck with a chain fastener in the center, with bow or buckle. No. 1603 is for misses and small women and is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 2 yards 29-inch, or 2 1/2 yards 36-inch material. Price 29 cents the pattern.

Every woman's desire is to achieve that smart distinct appearance which draws favorable comments from the observant public. The latest design illustrated in our new Fashion Book is original and will help you to acquire that much desired air of individuality. Price of the book 16 cents the copy.

WORLD HAPPENINGS  
BRIEFLY TOLD

Slavery has almost ceased in India, the Governor has notified the Viceroy of India.

The United States legation will establish offices in the Metropolitan Building in the heart of Ottawa.

Charles Montague White-Peter, 73, veteran of the South African War, and former member of the R.N.W.M.F., is dead at Vancouver.

Finally revised statistics on the Canadian automobile industry show that the number of motor cars produced during 1925 was 267,277, an increase of 36 per cent.

Hon. Judge Jas. Flynn, former Premier of the Province of Quebec, and judge of the Court of King's Bench of the Province of Quebec, is dead, after an illness of several weeks.

By September 1 the Independent Aircraft Co., Ltd., will have a factory in operation in Calgary, employing a hundred persons. It is announced. The company is capitalized at \$250,000 and will operate under a federal charter.

D. H. Poole, former secretary of the Manitoba Boys' Work board, has accepted the secretaryship of the National Boys' Work board, which represents the churches and the Y.M.C.A. in cooperative boys' work throughout Canada.

Dr. Abraham Ziegler, noted bacteriologist, who helped perfect the Schick test for diphtheria, was physiologist when he died in his laboratory at New York, while conducting research into the tick test for scarlet fever.

Canada will be represented at Geneva on the question of naval disarmament by Hon. Ernest Lapointe, minister of justice, and Mr. A. B. Reid. Mr. Lapointe is returning by way of the Suva route from Australia where he took part in the opening of the new capital at Canberra.

The Department of Agriculture has removed the embargo on cattle entering Canada from Great Britain, where an embargo was imposed on account of the foot and mouth disease. It was originally applicable to cattle from Great Britain, and was removed from Scottish cattle only about a month ago.

At the national jewelry cattle sale held at Trenton, N.J., a record price of \$3,500 was paid for a fourteen-ounce corner cut from a stock farm of B. H. Bull and Son, Hampton, Ont. A three-year-old Jersey cow from the Hampton farm was sold to John Lee, of Ohio, for \$1,625. This was the second highest price paid in the sale.

Complete Restoration  
of Rheims Cathedral

Historic Building Destroyed by German Fire is Again Open for Service

For thirteen long years the bells of the Cathedral of Rheims have remained silent. Thirteen years have elapsed since the last service was held in the building which in the eyes of the whole civilized world, was the symbol of France's sufferings, trials, and resistance.

Three dates stand out prominently in the cathedral's history. On September 4, 1914, the first German shell crashed through the north transept. On September 6, 1914, Mass was celebrated for the last time beneath the noble arches, under the shadows of which Joan of Arc five centuries ago had the Dauphin crowned King of France. On September 19, 1914, the cathedral was destroyed by the fire and the roof and bells crashed in, more than 400 tons of molten lead streaming down into the blazing furnace.

The long work of restoration is now terminated and the keys of the completed building have been handed over to Cardinal Lucien, Archbishop of Rheims.

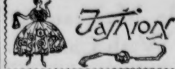

Plans for Russian Aviators

Five long flights are being planned for this year by the Society for the Development of Aviation and Chemical Industry in Russia. The first three will be within Russian territory, but a Soviet plane will attempt a flight to Stockholm, Copenhagen, Berlin, Paris, Prague, Vienna and back to Moscow. The fifth flight will be from Moscow to the Far East.

Australian wilderness abound in subterranean life which may be moved by artesian wells. Queensland now raises 600 million gallons per day. The artesian belt of Australia is larger than all Argentina.

The cry "Back to the farm" would mean more far raised by those who wish to go.

## Source of Chinese Munition Supply

Great Britain is Only Country Not Sharing in Business

Russia has hitherto been given the credit or discredit of being the source where the warring Chinese factions have obtained their supplies of arms and other materials of war. Russians have been frequently reported to be serving in both the Northern and Southern armies, and the chief agent in China of the Soviet government, believed to be still in Hankow, the seat of that faction of the Cantonese, most deeply imbued with the Communist ideas. Anxious to get fresh light on the origins of the Chinese arms supply, the contributor to the Nation and New Atherton, of London, England, who uses the pen-name of Kappa, conducted a private investigation of his own, involving a number of interesting facts. He found that while the Russians had contributed both armaments and men to both sides, some other nations had also been active in a similar way, notably Germany, that country sending to China during 1925 armaments to the value of \$1,500,000. Some surprise would be caused at finding Norway in the traffic to the extent of \$1,250,000, with Italy next, furnishing munitions worth \$1,000,000. United States manufacturers equipped the arsenal of the Cantonese, and France supplied the airplanes. Great Britain, indeed, was conspicuous inasmuch as it was the only country that did not share in the business.

European residents in China who were compelled to fly before the advancing Cantonese probably did not realize that the Nationalist troops were armed with Western weapons. The situation, as the Brockville Recorder and Times sees it, recalls its kinship to that existing during the war when the Canadian troops became the target of shells into whose construction nickel mined in Canada entered. That Great Britain has refrained from assisting the armings of the Chinese rebels greatly to her credit. It is evident enough that uprisings and internal warfare will recur in China as long as traffic in arms is permitted to proceed without interference from the great powers. It can scarcely be satisfactory to people that the very arms used at Nanking, where one American, at least, lost his life, may have been supplied by a United States munitions firm. The practical solution of the difficulty apparently lies in reaching an agreement limiting the traffic in arms and signing and ratifying the Arms Traffic Convention to that end. — St. Thomas-Journal.

Trucked Hogs Grade Well

With the extension of good highways from the marketing centres into the country the number of hogs delivered to the stockyards and packing houses by truck is constantly increasing. Not only is the delivery accomplished quickly, and therefore in good condition, but as was pointed out at a number of swine shows in Eastern Ontario by Mr. Eric D. McGee, the sheep and swine promoter of the Live Stock Branch at Kingston, it leads to rapid improvement in the grades because the farmer can care for himself the type of hog for which the highest price is paid. This explains why the percentage of sales in hogs trucked to market is usually higher than where they are shipped by rail.

Issuing Jubilee Stamps

Postmaster-General Venable is issuing a special series of postage stamps to commemorate the Diamond Jubilee of Confederation. They will be larger than the normal issue, and will depict the development of the Dominion, the expansion of its transportation systems and various phases of the nation's industries and resources. It is stated the stamps will bring joy not only to philatelists, but to the general public.

Tom—How can that little birthday gift for your wife be a surprise if she told you what she wanted?

Henry—"I'm not going to give it to her."

Employment at High Point

Returns Show That Employment is Now at Highest Peak Since 1920

Reports up to May 1 of this year from 5,948 firms showed that employment in Canada was at the highest point it has been since the Canadian Government Bureau of Statistics began to keep employment records in 1920.

The official returns on employment in Canada do not include farmers. In the months of April and May there is always a considerable demand for farm labor to help in the seeding, particularly so in Western Canada, where millions of acres are sown to wheat and other grain crops.

Woman Radio Expert

Has Worked Up Well Paying Business in Brooklyn, N.Y.

Three years ago Miss Harriette B. Quick, of Brooklyn, N.Y., bought a radio set. It intrigued her. She took it apart to see what made it work, and finding that it was not nearly made, she rebuilt it to suit herself. Later Miss Quick showed the rebuilt set to some of her friends and they liked it so well they ordered sets like it. That started her in business and she set up a work bench and started filling orders. Now she does nothing else but build radio sets, except when she is called out for a trouble shooting. She is Brooklyn's only woman radio engineer and one of the few female radio experts in the world.

Origin of "Humbung"

"Humbung" originated when James H. of England coined base metal in his fight for the crown. The Irish called it Uim Bog (worthless money), which became first Oumbung and then Humbung.

How easy it is to tell others that it's no use to worry.

Keep both eyes open on an enemy who wants to do you a favor.

SUNDAY SCHOOL LESSON

JUNE 19

PETER TEACHES GOOD CITIZENSHIP

Golden Text: "Love worketh no ill to his neighbor."—Romans 13:10.

Lesson 1 Peter 2:13-17; 4:15.

Devotional Reading: Psalm 146: 6-10.

Explanations and Comments

1. The Sunday Life, 2:11, 12.—"I heard, I heard you as seafarers and pilgrims," thus Peter addresses his readers. Peter is here speaking metaphorically, he wishes them to realize that life is a journey, not a goal, and that the attainment of character which is eternal should be their aim; they were living, as it were, in exile on earth, heaven was their true home.

"The Christian looks for a life eternal. In comparison thereof the best things of this time are of little account. It is but as a lodging for a brief night, and at dawn the traveler sets forward for his true home."

"Since they had but a short time to stay on earth they must live their brief life nobly. 'I beseech you to abstain from all fleshly lusts, which war against the soul,' says Peter's words."

"Not let us so narrow his interpretations that the majority of us escape the grip of the apostle's injunction. Let us attribute a comprehensive content to the unwelcome word 'abstain'—include the entire army of unclean forces which are antagonistic to the exalted realm of the spirit. It includes not only the carnal desire, but the jealous eye and the itching palm. Finally let us realize that the life which is eternal is everlasting in life which means the wideness of spirit. Finally let us realize that the life which is eternal is everlasting in life which means the wideness of spirit. Finally let us realize that the life which is eternal is everlasting in life which means the wideness of spirit."

"Having your behavior seemly among the Gentiles, that, being asked against you as evildoers, they may by your good works, which they behold, glorify God in the day of visitation." How like an echo from the Sermon on the Mount this seems! "Let your light shine before men; they may see your good work, and glorify your Father who is in heaven." So Christ's pilgrim leaves a track of light behind him; he is a witness. The phrase "in the day of visitation" suggests a fear in the apostle's heart lest the response to this witness might not be immediate; it might have to abide Christ's own time. The hour of visitation which will also be the hour of illumination will come, and then all the quiet witness will tell—the holy work, the patient endurance, the lofty testimony the life that is fair to see."—J. M. E. Ross.

Employment at High Point

Returns Show That Employment is Now at Highest Peak Since 1920

Reports up to May 1 of this year from 5,948 firms showed that employment in Canada was at the highest point it has been since the Canadian Government Bureau of Statistics began to keep employment records in 1920.

"The payrolls of the 5,948 firms reporting on May 1, showed that there were 330,500 persons employed. Manufacturing, construction and transportation recorded the most pronounced improvement, but large gains were also noted in trade, services and communication."

The official returns on employment in Canada do not include farmers. In the months of April and May there is always a considerable demand for farm labor to help in the seeding, particularly so in Western Canada, where millions of acres are sown to wheat and other grain crops.

Woman Radio Expert

Has Worked Up Well Paying Business in Brooklyn, N.Y.

Three years ago Miss Harriette B. Quick, of Brooklyn, N.Y., bought a radio set. It intrigued her. She took it apart to see what made it work, and finding that it was not nearly made, she rebuilt it to suit herself. "Not let us so narrow his interpretations that the majority of us escape the grip of the apostle's injunction. Let us attribute a comprehensive content to the unwelcome word 'abstain'—include the entire army of unclean forces which are antagonistic to the exalted realm of the spirit. It includes not only the carnal desire, but the jealous eye and the itching palm. Finally let us realize that the life which is eternal is everlasting in life which means the wideness of spirit. Finally let us realize that the life which is eternal is everlasting in life which means the wideness of spirit."

"Having your behavior seemly among the Gentiles, that, being asked against you as evildoers, they may by your good works, which they behold, glorify God in the day of visitation." How like an echo from the Sermon on the Mount this seems! "Let your light shine before men; they may see your good work, and glorify your Father who is in heaven." So Christ's pilgrim leaves a track of light behind him; he is a witness. The phrase "in the day of visitation" suggests a fear in the apostle's heart lest the response to this witness might not be immediate; it might have to abide Christ's own time. The hour of visitation which will also be the hour of illumination will come, and then all the quiet witness will tell—the holy work, the patient endurance, the lofty testimony the life that is fair to see."—J. M. E. Ross.

Employment at High Point

Returns Show That Employment is Now at Highest Peak Since 1920

Reports up to May 1 of this year from 5,948 firms showed that employment in Canada was at the highest point it has been since the Canadian Government Bureau of Statistics began to keep employment records in 1920.

"The payrolls of the 5,948 firms reporting on May 1, showed that there were 330,500 persons employed. Manufacturing, construction and transportation recorded the most pronounced improvement, but large gains were also noted in trade, services and communication."

The official returns on employment in Canada do not include farmers. In the months of April and May there is always a considerable demand for farm labor to help in the seeding, particularly so in Western Canada, where millions of acres are sown to wheat and other grain crops.

Woman Radio Expert

Has Worked Up Well Paying Business in Brooklyn, N.Y.

Three years ago Miss Harriette B. Quick, of Brooklyn, N.Y., bought a radio set. It intrigued her. She took it apart to see what made it work, and finding that it was not nearly made, she rebuilt it to suit herself. Later Miss Quick showed the rebuilt set to some of her friends and they liked it so well they ordered sets like it. That started her in business and she set up a work bench and started filling orders. Now she does nothing else but build radio sets, except when she is called out for a trouble shooting. She is Brooklyn's only woman radio engineer and one of the few female radio experts in the world.

Origin of "Humbung"

"Humbung" originated when James H. of England coined base metal in his fight for the crown. The Irish called it Uim Bog (worthless money), which became first Oumbung and then Humbung.

How easy it is to tell others that it's no use to worry.

Keep both eyes open on an enemy who wants to do you a favor.

Getting The  
West's Money

High Pressure Salesmen Selling Worthless Securities to the Unwary

The Saskatchewan Farmer calls attention to the "high-pressure salesmen peddling highly speculative or worthless stock who are 'infesting' the Western Provinces." These men, he says, are conducting what has been termed one of the largest financial campaigns in the history of the West. Some of them are selling all stocks without any apparent value, and others are disposing of alleged gold and mine securities, while more or less uncertain industrial securities are also being offered.

It is the old story of inducing people to believe they can get rich quickly. It is being told in the East as well as the West, but perhaps the latter appear like a more remunerative field at present. The farmers are prosperous, and there may not have had the war-time which have been given from time to time in this part of the country.

Until now law can be found to protect the unwary investor he will continue to be prey for the promising salesman with a highly decorated case is not so serious, but when a man who can afford to take a chance, and who parts with his money knowing that he is merely gambling, the case is not so serious, but when a widow with a limited income is induced to buy worthless securities for the pension money, this becomes a matter for community interference. There should be a way to protect her, but the most effective means, so far, is to be through publicity. Too many people do not realize that stocks and bonds paying nominal dividends are not so beguiling for buyers. When they are approached by salesmen claiming to have such securities to offer they should consider the fact that a banker before purchasing, and the chances are that they will be glad to keep their money.—Toronto Globe.

## DIAMOND JUBILEE CELEBRATION

Commemorating Canada's 60th

Anniversary of Confederation

Oyen, Alta. Friday, July 1, 1927

## About Town and Country

Don't forget the monster Diamond Jubilee Celebration in Oyen, on July 1. All roads lead to Oyen that day.

Oyen Agricultural Fair, July 27-28.

Mr. L. Pears of Alix, Alta., arrived in Oyen last Thursday to join the staff at S. A. Miller's general store.

Ed O'Riley's dance on Monday night was well attended, and proved a very enjoyable event. Len Davis and his Arcadians delighted the dancers with their peppy music.

Prize lists for the thirteenth annual summer fair of the Oyen Agricultural Society, will be ready for distribution on Saturday. Apply to the secretary, Mr. W. H. Peterson.

"Painted Fires" a novel by Nellie L. McClung, is now running in the News in serial form. The first installment, commenced in last week's issue.

#### CARD OF THANKS

Mr. and Mrs. L. D. Parker and family wish to thank friends and neighbors for their kindness and sympathy extended in their recent sad bereavement.

#### June Rainfall To Date

June 8th: .31 inch  
June 9th: .23 inch  
June 14th: .59 inch  
June 15th: (7 a.m.) .10 inch

Total 1.23 inches

#### PROMINENT BRITISH TRADE UNIONIST

Frank Hodges, who for the past two years has occupied the position of secretary of the International Miners' Federation, has resigned. According to reports, his withdrawal marks the culmination of a long campaign carried on by his opponents, led by A. J. Cook, better known as the "Emmeret", general secretary of the Miners' Federation.

#### PLANS OTTAWA TO LONDON FLIGHT

Captain E. J. Janney, Canadian aviator, who hopes to make a message from the people of Canada to King George by a non-stop flight from Ottawa to London as part of the Diamond Jubilee of Confederation celebration.

#### C. P. Snyder Will Erect New Building Corner of Main Street and Railway Ave

C. P. Snyder has purchased the corner lot on Main Street, and is going to erect a 30 by 120 ft. building, in which on completion, he will conduct his Ford motor car and L.H.C. implement business, with the addition of a gasoline filling and oil station.

Mr. Snyder plans to have the new premises ready for occupation by the middle of July.

#### Premier to Visit Old Country

The attitude of British industry and capital towards further investment in Western Canada and the possibility of establishing closer relations between Great Britain and this province will be one of the matters investigated by Premier Brownlee in the course of a trip to the old country on which he expects to leave late in June. In addition to looking into the British emigration policy as it affects the province, the Premier will make extensive inquiries into the possibility of enlarging the market for Alberta products in the old land.

#### Pool to Build Coast Elevator

Construction will be started shortly, it is announced, on the 2,400,000 bushel elevator to be erected by the Alberta Wheat Pool at Vancouver, and it is expected that the big plant will be ready to handle grain from the 1927 crop.

Carload of 3 C.W. oats expected on track to day. E. D. Thygesen, A. P. Elevator.

## General Farm Expenses

IN summer months current farm expenses often prove a worry and a burden to farmers whose whole mind should be centered on their crops and livestock.

This worry is unnecessary. By establishing connections with the Bank of Toronto, farmers with good security can readily secure a loan until such time as their crops are sold.

The nearest Bank of Toronto branch manager will be glad to talk with you today. Be assured that your relations with him will be as confidential and personal as with your lawyer.

## THE BANK OF TORONTO

OYEN BRANCH  
H. R. Chaplin, Manager

John F. Miller, Eye Sight Specialist of 104 Underwood Block, Calgary, will be at Hotel in Oyen on Saturday, June 25th for the purpose of correcting yours and your children's eyes. Do not miss this opportunity.

## LEGAL NOTICE

#### FARM FOR SALE BY TENDER

S. J. Sec. 32, Tp. 39, Rge. 4, West of 14th M. Alberta, subject to taxes subsequent to December 31st 1926.

Tenders will be received up to 11 a.m. on Monday the 27th day of June, A.D. 1927, for the purchase of the above described property.

Tender marked S.C. 2727, should be forwarded together with marked cheque for 5 per cent of the amount of the tender to L. F. Clary, Esq., R.C.L. Master in Chambers, Court House, Calgary, Alberta.

This farm is about 13 miles from Oyen, and two miles from the nearest school. There are approximately 329 acres, of which about 260 acres have been cultivated, including 75 acres unsown. Other improvements consist of a 1 1/2 storey home with additions; Barn 10x30 with 2 horse-tooths; 2 grain bins and 12x14 one good well and a 2 wire fence all around.

No tender necessarily accepted, 5 per cent with tenders, 5 per cent upon acceptance, 15 per cent within sixty days without interest, and the balance in equal instalments of 4, 12, 18 and 21 months after acceptance, with interest at 8 per cent per annum. If purchaser desires, full payment will be accepted within sixty days without interest.

In all other respects, standing Conditions of Sale to apply.

Conditions of Sale and other particulars may be obtained from Messrs. C. F. Adams & Edwards, Bank of Montreal Building, Calgary, Alberta, Solicitors for the Plaintiff.

DATED at the City of Calgary, in the Province of Alberta, this 14th day of May, A.D. 1927.

"A. G. A. CLOWES"

APPROVED  
L. F. CLARY  
Master in Chambers.
